Dear Ms. Jones,

The ERISA Industry Committee (ERIC) is pleased that the Louisiana Board of Examiners for Speech-Language Pathology and Audiology (Board) has issued proposed regulations that recognize the potential benefits of telehealth and welcome the opportunity to share our support for leveraging telehealth to increase access to healthcare. On behalf of ERIC, I want to thank you for thoughtfully developing your regulations to maximize the benefits of telehealth, and to express large employers' interests on this issue.

As the only national trade association advocating solely for the employee benefit and compensation interests of America's largest employers, ERIC speaks in one voice for large employers on public policy issues relating to employee benefits. Our members have workers in every state across the country, including many Louisianans.

ERIC's members are committed to, and known for, providing high-quality, affordable health care to millions of workers and their families. ERIC has a strong interest in proposals that affect its members' ability to deliver cost-effective benefits. ERIC's members devote considerable time and resources to their benefit plan design, balancing the provision of high-quality, affordable health care with the need to contain costs for these programs.

Our members need consistent telehealth policies around the country so that their workers and their families can enjoy the same company benefits regardless of the state in which they live or work. It is imperative that funds to pay benefits are maximized and not diverted to administrative and compliance burdens stemming from a myriad of disparate and potentially conflicting state rules and regulations.

In addition to improved access to health care, employers support telehealth for these reasons:

- **Accessibility. Flexibility. Without barriers.** Telehealth gives employees and their families access to health care 24 hours a day, seven days a week, whether at home, in transit, or at work, without regard to standard office hours and proximity to a health care provider.
- **Benefits for rural, urban, and working families.** Telehealth has long been seen as a means for providing access to care for rural populations. Urban underserved populations, retirees, the elderly, disabled employees, and those with language barriers, chronic conditions, or transportation barriers also stand to benefit from increased access to care, as well as working parents and others struggling to balance work and family demands.

- **Increased workforce satisfaction.** The response from employees who have used telehealth services is very positive. Employees want to minimize the time spent attending to their health needs, or that of loved ones, and appreciate the opportunity to reach a health care professional at times and locations that are convenient to them. They like the service and want it to continue.
- **Connection to workplace clinics, rural health centers and employer wellness initiatives.** Telehealth services can complement employer workplace clinics as well as rural health centers. Telehealth also supports wellness initiatives that employers offer to further employee health and wellbeing.
- **Cost-effective care.** Employees, retirees, and their families need access to health care that they can utilize because it is provided at an affordable, cost-effective rate.

ERIC respects and supports the Board's duty to protect the public and consider patient safety while developing telehealth policies. ERIC agrees with the Board that the standard of care and professional ethics governing in-person visits should apply in the same manner to telehealth visits. We also appreciate the Board's technology-neutral definition of telehealth.

To achieve a balanced regulatory environment for telehealth, ERIC encourages the Board, to the extent permitted by law, to:

- ADOPT technology-neutral requirements, permitting use of different types of technology platforms that are designed for telehealth;
- ADOPT licensing policies that facilitate inter-state practice so providers, located in or out of the state, who deliver high-quality care, can serve patients located in Louisiana;
- AVOID restrictions that require patients to visit specific locations (e.g., "originating sites") in order to access telehealth services;
- AVOID imposing additional requirements on providers that offer telehealth services that are not imposed on in-person visits; and
- CONSIDER the needs of patients to have better access to care that can be provided via telehealth, either through a telehealth visit or remote monitoring of health conditions.

Thank you for considering large employers' interests as you finalize your telehealth regulations. ERIC is pleased to represent large employers with the goal of ensuring telehealth benefits are accessible for millions of workers, retirees, and their families. For more information about ERIC's work on telehealth, please contact me at 202-627-1925 or [awils@eric.org](mailto:awils@eric.org). ERIC welcomes additional questions and opportunities to contribute to your rulemaking process.

Sincerely,

Allison Wils  
Director of Health Policy
